

# YOU ARE INVITED TO ATTEND a patient presentation to learn about VONVENDI® in the treatment of adult patients with VWD

## About the VWiD Program

Our goal is to continue to educate the von Willebrand disease community with impactful, relevant von Willebrand disease (VWD) programs. The VWiD program provides the opportunity for members to hear stories, receive information, and connect with other members of the community.

We invite adults with VWD to attend this session.

This program is for U.S. patients and caregivers only and is not intended for healthcare professionals. All patient attendees must be of an appropriate age for the disease state and/or products being discussed. Patient attendees may bring up to two caregivers/ family members. Attendees under the age of 18 must register with and be accompanied by an adult. Attendee expenses are not reimbursable. This program is for educational purposes only and is not a substitute for the advice provided by your healthcare provider. Consult your healthcare professional for your medical concerns.

## What is VONVENDI?

VONVENDI is used in adults (age 18 years and older) diagnosed with von Willebrand disease to:

- treat and control bleeding episodes
- prevent excessive bleeding during and after surgery
- reduce the number of bleeding episodes when used regularly (prophylaxis) in adults with severe Type 3 von Willebrand disease receiving on-demand therapy

## SELECTED IMPORTANT RISK INFORMATION

### Who should not use VONVENDI?

You should not use VONVENDI if you:

- Are allergic to any ingredients in VONVENDI.
- Are allergic to mice or hamsters.

Tell your healthcare provider if you are pregnant or breastfeeding because VONVENDI may not be right for you.

## Join us at our next event:

### Speaker:

Erica W.

### Date:

Thursday, August 29, 2024

### Time:

06:00 PM Central Time

### Location:

Seasons 52  
340 Ward Parkway  
Kansas City, Missouri 64112

### RSVP to:

Angela Brown (816) 479-5900  
[angela.brown@midwesthemophilia.org](mailto:angela.brown@midwesthemophilia.org)

### RSVP by:

August 24, 2024

Thank you for your interest.  
We look forward to seeing you there!

# VONVENDI [von Willebrand factor (recombinant)] Important Information

## What is VONVENDI?

VONVENDI is used in adults (age 18 years and older) diagnosed with von Willebrand disease to:

- treat and control bleeding episodes
- prevent excessive bleeding during and after surgery
- reduce the number of bleeding episodes when used regularly (prophylaxis) in adults with severe Type 3 von Willebrand disease receiving on-demand therapy

## Detailed Important Risk Information

### Who should not use VONVENDI?

You should not use VONVENDI if you:

- Are allergic to any ingredients in VONVENDI.
- Are allergic to mice or hamsters.

Tell your healthcare provider if you are pregnant or breastfeeding because VONVENDI may not be right for you.

### How should I use VONVENDI?

Your first dose of VONVENDI for each bleeding episode may be administered with a recombinant factor VIII as instructed by your healthcare provider.

Your healthcare provider will instruct you whether additional doses of VONVENDI with or without recombinant factor VIII are needed.

### What should I tell my healthcare provider before I use VONVENDI?

You should tell your healthcare provider if you:

- Have or have had any medical problems.
- Take any medicines, including prescription and non-prescription medicines, such as over-the-counter medicines, supplements or herbal remedies.
- Have any allergies, including allergies to mice or hamsters.
- Are breastfeeding. It is not known if VONVENDI passes into your milk and if it can harm your baby.
- Are pregnant or planning to become pregnant. It is not known if VONVENDI can harm your unborn baby.

### What should I tell my healthcare provider before I use VONVENDI? (continued)

- Have been told that you have inhibitors to von Willebrand factor (because VONVENDI may not work for you).
- Have been told that you have inhibitors to blood coagulation factor VIII.

### What else should I know about VONVENDI and von Willebrand Disease?

Your body can form inhibitors to von Willebrand factor or factor VIII. An inhibitor is part of the body's normal defense system. If you form inhibitors, it may stop VONVENDI or factor VIII from working properly. Consult with your healthcare provider to make sure you are carefully monitored with blood tests for the development of inhibitors to von Willebrand factor or factor VIII.

### What are the possible side effects of VONVENDI?

You can have an allergic reaction to VONVENDI.

Call your healthcare provider right away and stop treatment if you get a rash or hives, itching, tightness of the throat, chest pain or tightness, difficulty breathing, lightheadedness, dizziness, nausea or fainting.

Side effects that have been reported with VONVENDI include: headache, nausea, vomiting, tingling or burning at infusion site, chest discomfort, dizziness, joint pain, joint injury, increased liver enzyme level in blood, hot flashes, itching, high blood pressure, muscle twitching, unusual taste, blood clots and increased heart rate.

Tell your healthcare provider about any side effects that bother you or do not go away.

**You are encouraged to report negative side effects of prescription drugs to the FDA.**

Visit [www.fda.gov/medwatch](http://www.fda.gov/medwatch), or call 1-800-FDA-1088.
